

Go Green®

Product Technical Data Sheet

Go Green® is a proprietary blend of living green algae (Chlorophyta) and yellow-green algae (Xanthophyta) cells, suspended in fresh water. Go Green® is viable and is able to promptly reproduce to provide soil structure benefits, provide nutrients for plants, and act as an irrigation system cleaning agent. **Go Green®** is 100% natural and can be used with any irrigation system or fertilization program.

Contents

Chlorella vulgaris	1×10 ³ cells per mL
Nannochloris atomus	1×10 ³ cells per mL
Scenedesmus quadricauda	1×10 ³ cells per mL

Physical Characteristics

Solubility in water:	99%
Appearance and odor:	Green, algal odor

Non-plant Food Ingredient

Algal cells

Density

8.30 lb per gallon
1.00 kg per liter

Application Details

Apply 1 gallon (four – 1 qt applications): acre/crop cycle. Can be applied undiluted or diluted at 20:1 (water to Go Green®) through drip, pivot or sprinkler irrigation system. Apply by furrow or flat irrigation by adding undiluted Go Green® to any water vessel, up to 500 gallons, and the mix then trickled into the irrigation system.

Handling and Storage

In case of accidental exposure, flush with water. Product is non-hazardous. Store in a cool dry place out of direct sunlight. Use Product within 90 days from date of delivery. Do not allow product to freeze
