

BioFlora® 6-0-0 + 8% Ca **Product Technical Data**

BioFlora® 6-0-0 + 8% Ca is a soluble liquid product formulated to correct calcium deficiencies in all types of plants. It is a bio-organic product chelated with natural hydrocarbons. It is readily assimilated into the root stem and leaf cells of plants. The unique carbon and organic acid structure of **BioFlora® 6-0-0 + 8% Ca** and its quick uptake into the plant help increase membrane permeability, increase stress resistance, stimulate cell division and metabolism.

Guaranteed Analysis

Total Nitrogen (N).....6.00%
6.00% Nitrate Nitrogen
Water Soluble Calcium (Ca).....8.00%

Derivation

Derived from urea and calcium nitrate

Density

11.50 lb per gallon
1.38 kg per liter

Directions for Use

BioFlora® 6-0-0 + 8% Ca is a systemic nutrient and should be applied prior to heat or cold waves, drought and other conditions which limit calcium intake. Use as a foliar or soil application. Product should be mixed with 40-50 gallons of water prior to application.

Compatibility

Do not mix with phosphate fertilizers in low volume irrigation systems. Avoid mixing with Humega®, aqua ammonia, urea sulfuric acid, soil fumigants, phosphorus or sulfate-based materials.

Storage and Handling

Do not store in galvanized steel or black iron tanks for prolonged periods; use non-metal piping and valves. Store in cool, dry place out of direct sunlight.

Product Support

Consult your BioLynceus® representative for product support, application information and current pricing. Do not allow product to freeze.
