

## **ProBiotic Scrubber® OCC      Product Technical Data**

**ProBiotic Scrubber® OCC** is a natural liquid bioaugmentation formulation designed to promote decomposition of organic materials without the production of H<sub>2</sub>S and other malodorous gases. **ProBiotic Scrubber® OCC** contains a proprietary combination of naturally occurring beneficial microorganisms, biostimulants, amino acids and vitamins, which encourage biological degradation.

### **Derivation**

Derived from kelp, blue-green algae, minerals, micronutrients and naturally occurring bacteria.

### **Density**

8.30 lb per gallon

0.99 kg per liter

### **Storage**

It is recommended that the product be used within 6 months of purchase. Avoid excessive heat. Avoid direct sunlight. Do not allow product to freeze.

### **Handling**

Product is non-hazardous. In case of accidental exposure, flush with water. Refer to SDS.

### **Application Instructions**

Application rates require recommendations by a BioLynceus® representative for this product. All application details and project scope for the use of this product is only available from a BioLynceus® representative due to the complexity of different sites and the different types of facilities.

### **Application & Program Efficacy**

This is a specialty blend that is premixed for the prescribed application. Product should be used within six months of date of purchase. Product contains biostimulants, nutrients and natural occurring microbiology and should be used as prescribed by your BioLynceus® representative. For any questions about the program application and site specific strategies to mitigate H<sub>2</sub>S and other malodors, please consult with your BioLynceus® representative.

## Features and Benefits

Utilized in wastewater streams to mitigate H<sub>2</sub>S

- Provides natural materials to remediate contamination in water and soils
- Can be used to remediate industrial contaminants
- Is a suitable solution for reduction for BOD, TSS, H<sub>2</sub>S and FOG
- Does not contain materials that are toxic or harmful to the environment
- Is an effective remediation technology for removal of many contaminants found in wastewater collection systems, including industrial and pre-treatment applications

### **Keep Away From Children – Not for Human Consumption**

*Note: buyer assumes all risk of use, storage and handling of this material. Neither the manufacturer, seller, nor its agents, make any warranty, expressed or implied, concerning this product, except in conformity with statements on the label. Information regarding this product can be obtained from BioLynceus®. Do not allow product to freeze.*
