

ProBiotic Scrubber® 00

Product Technical Data

ProBiotic Scrubber® 00 is a proprietary formulation of biostimulants, amino acids, vitamins and natural occurring bacteria designed to enhance degradation of detergents, waxes, organic solids and petroleum hydrocarbons in car wash systems.

Application Instructions

All recommendations below are general in nature. Special formulations and rates may be required for a specific situation. Contact a BioLynceus® representative for specific application inquiries.

Density

8.30 lb per gallon

0.99 kg per liter

Car Wash

- Reduces objectionable odors
- Breaks down sludge
- Reduces contaminants
- Improves aeration
- Breaks down grease
- Breaks down hydrocarbons

Directions for Application

For systems using not more than 80,000 gallons of processed water per day, inject ProBiotic Scrubber® 00 at a rate of 10 oz. per day, using a pumping system. For systems running more than 80,000 gallons of processed water per day, contact BioLynceus® at 970-586-3391.

ProBiotic Scrubber® 00 when used in combination with other processes, effectively works on degrading undesirable materials found in wastewater processes for car washes. ProBiotic Scrubber® 00 is most effective when applied to the processed water where it degrades chemicals and organic materials that promote septic odors. The consistent use of ProBiotic Scrubber® 00 provides active microbiology to degrade materials that contribute to congestion in systems from grease, sludge and anaerobic wastewater.

Keep Away From Children – Not for Human Consumption
