

# ProBiotic Scrubber® Septic System Solution

## Product Technical Data

**ProBiotic Scrubber® Septic System Solution** is a proprietary scientific formulation of biostimulants and amino acids, which enhance the biological degradation of solids in septic tanks and wastewater ponds. This product will help clean drain lines of sludge and grease buildup.

### Derivation

Derived from kelp, blue-green algae, *B. licheniformis*, *B. subtilis*, *S. cerevisiae* & *P. stutzeri*, minerals and micronutrients.

### Density

8.50 lb per gallon

1.02 kg per liter

### Application Information

For new or recently cleaned septic systems add 1 quart per month through any drain or toilet that is directly connected to your septic tank or pond. Flush with water after application. The application may be split among several drains or alternate drains monthly. Do not add ProBiotic Scrubber® Septic System Solution to any drains connected to a greywater system.

For older or troublesome septic systems the initial application should be 4 quarts followed by then adding 1 quart per month using the methods described in paragraph 1 above. For limited use septic systems, like seasonal use properties, add 3 to 4 quarts per calendar quarter (or visit to the property) through any drain that is directly connected to your septic tank or pond.

This product is designed to improve biodegradation of solids in your system and help keep leach lines and fields open. It is not designed to repair any structural damage to your drain lines, septic tanks or leach lines. ProBiotic Scrubber® Septic System Solution is not effective in removing tree roots from lines or tanks.

### **Keep Away From Children – Not for Human Consumption**
